

SNEHA AGARWAL

Full Stack Developer | Frontend Developer | Software Engineer

Ghaziabad, Uttar Pradesh, India • snehaagarwal805@gmail.com • +91-9917887838 • linkedin.com/in/sneha-agarwal-b35176251 • github.com/sneha26122003

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and MCA student with hands-on experience in React.js, PHP, Laravel, JavaScript, MySQL, and REST API integration. Skilled in designing and developing responsive, scalable web applications with clean frontend and backend architecture. Proven track record of optimizing application performance, implementing secure authentication systems, and building reusable component libraries that accelerate development workflows. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, SDLC, debugging, and cross-browser compatibility. Passionate about delivering high-quality, maintainable code and seamless user experiences for modern web platforms.

TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, C, SQL

Frontend Development: HTML5, CSS3, Bootstrap, React.js, Responsive Web Design, Cross-Browser Compatibility, UI/UX Design Principles

Backend Development: PHP, Laravel, REST API Development, RESTful Services, Server-Side Logic, Authentication, Session Management

Database: MySQL, Relational Database Design, Query Optimization, CRUD Operations, Database Management, Eloquent ORM

Frameworks & Libraries: React.js, Laravel, Bootstrap

Tools & Platforms: Git, GitHub, VS Code, Postman, Version Control, Command Line Interface

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), API Integration, Debugging, Performance Optimization, Agile Development, Component Architecture, Scalable Application Design

INTERNSHIP EXPERIENCE

Web Developer Intern

Cognifyz Technologies | Remote | June 2024 – July 2024

- Developed fully responsive web applications using HTML5, CSS3, JavaScript, and React.js, improving overall user interface quality and cross-device compatibility.
- Optimized frontend performance through code refactoring, image compression, and lazy loading strategies, reducing average page load time by approximately 25%.
- Integrated RESTful APIs to enable dynamic data rendering and real-time content updates across multiple application modules.
- Collaborated with a cross-functional development team using Git version control to streamline sprint workflows and improve delivery efficiency by 20%.

Web Developer Intern

OctaNet Services | Remote | July 2023

- Engineered modular, reusable React.js components that reduced overall development time by approximately 30% and improved long-term codebase maintainability.
- Integrated third-party REST APIs to extend application functionality and deliver dynamic, data-driven user interfaces with real-time content updates.
- Enhanced application rendering performance through React component optimization, memoization, and efficient state management using hooks.
- Collaborated with UI/UX designers to implement pixel-accurate, fully responsive layouts ensuring consistent cross-browser compatibility across Chrome, Firefox, and Safari.

Web Development Intern

TechnoHacks | Remote | July 2023 – August 2023

- Built and maintained responsive frontend web pages using HTML5, CSS3, and JavaScript, achieving 100% task completion rate throughout the internship.
- Applied responsive web design principles to ensure seamless rendering across desktop, tablet, and mobile screen sizes.
- Debugged and resolved UI inconsistencies, layout issues, and cross-browser compatibility problems, improving overall application stability.
- Demonstrated strong analytical thinking and problem-solving skills while working effectively within a fast-paced, deadline-driven development environment.

PROJECTS

E-Commerce Website — PHP | MySQL | HTML5 | CSS3 | Bootstrap | JavaScript

github.com/sneha26122003

- Architected a full-stack e-commerce platform featuring user authentication, product catalog, shopping cart functionality, and an admin panel for inventory and order management.
- Implemented secure session-based authentication and role-based access control (RBAC) to separate customer-facing and administrator workflows.
- Designed a normalized MySQL relational database schema to support scalable product, order, and user data management with referential integrity.
- Built a fully responsive, mobile-friendly UI using Bootstrap, ensuring seamless browsing experience across all screen sizes and devices.

CRUD Blog API — Laravel | PHP | MySQL | REST API | Laravel Sanctum

github.com/sneha26122003

- Developed a RESTful API using Laravel framework with full CRUD operations for blog post management, including structured create, read, update, and delete endpoints.
- Optimized Eloquent ORM queries and implemented MySQL database indexing, improving API response time by approximately 20%.
- Implemented token-based API authentication using Laravel Sanctum to secure protected routes and enforce endpoint authorization.
- Structured all API responses with consistent JSON formatting, proper HTTP status codes, and centralized error handling for clean frontend integration.

React Chat UI — React.js | JavaScript | CSS3 | Bootstrap | React Hooks

github.com/sneha26122003

- Developed a dynamic, interactive real-time chat interface using React.js with a modular component architecture designed for scalability and reusability.
- Engineered reusable UI components including message bubbles, chat input, and user list panels, significantly reducing component rendering overhead.
- Implemented efficient state management using React useState and useEffect hooks to enable smooth, low-latency UI updates and real-time interaction.
- Designed a fully responsive layout compatible with desktop and mobile viewports, prioritizing accessibility, readability, and cross-browser compatibility.

EDUCATION

Master of Computer Applications (MCA)

Ajay Kumar Garg Engineering College, Ghaziabad | 2023 – Present | CGPA: 3.28 / 4.00

CERTIFICATIONS & ACHIEVEMENTS

- Web Developer Intern – Cognifyz Technologies: Delivered 25% page load time reduction and 20% workflow efficiency improvement through performance optimization and API integration.
- Web Developer Intern – OctaNet Services: Reduced development time by 30% through reusable React.js component engineering and REST API integration.
- Web Development Intern – TechnoHacks: Maintained 100% task completion rate; implemented responsive, cross-browser-compatible web interfaces.
- Proficient in Data Structures and Algorithms (DSA) and Object-Oriented Programming (OOP) with practical implementation in full-stack project development.
- Active GitHub contributor with a maintained portfolio of full-stack, frontend, and API web development projects.
- Experienced in Agile development workflows, sprint-based delivery, and collaborative software development using Git and GitHub version control.
